In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 159 tCO2e by 2028. This is a reduction of 66%

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emission reduction achieved by these schemes equate to a 9% reduction against the 2019 baseline and the measures will be in effect when performing the contract which is:-

33

Tonnes CO2e

- Move to virtual meetings using Microsoft Teams
 LED lighting
 Heating ventilation and air conditioning (HVAC) efficiency upgrades
- Energy reduction program switch off policy, what runs, runs when needed only.
- 33% of fleet transitioned to EV or Hybrid
- Where work circumstances allow, employees given options for flexible working model to reduce accommodation requirements

In the future we hope to implement further measures such as:

- Migrate multi tenanted properties we occupy to 100% renewable electricity.
 - Improve efficiencies in electricity consumption.
- Ongoing optimisation of building energy use and ensuring longer term strategies for building heating decarbonisation.
- Improve data and reporting to improve accuracy of carbon accounting.

 Reduce business travel emissions by greening our fleet and increase use of online meeting tools. Transport emissions will fall as cars, trains and planes produce less carbon.

 Engage with supply chain to ensure suppliers set science-based carbon reduction targets and commit to net zero. Monitor top 200 supplier emissions annually
- Reduce commuting emissions

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting^[2]. Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
